The Store with the Goods

Breezels

It is reported that the government promises to look after the Alberta brine springs, which are said to contain 98½ per cent. of salt.

It is an old saying that some promises should be taken with a grain of salt. Maybe the government thinks that some of their promises should be taken with a lb of salt.

A Liquid Air Co. is erecting a plant in Calgary.

No, Susie, it is not for the manufacture of a liquid hair restorer, nor is it in opposition to the Alberta government's liquid hair-raising tangle-leg.

The government liquor dispensary in Vancouver took in \$18,000 during September. The average receipts in this store are a little under \$1000.00 an hour. It is estimated that another \$100,000.00 a month goes to the physicians for prescriptions.

By its own legislation the B. C. government has constituted itself the saloon keeper and the physicians and druggists the bartenders.

Another Calgary district oil well is reported to have brought oil in commercial quantities.

But there does not appear to be any wild rush to "get in on the ground floor" of the gusher.

Both of the "Old Parties" in the recent Ontario elections were "snowed under" badly.

"Coming events cast their shadows before"—in the west.

A new dirigible has been invented by an Italian.

A new man-killer over which to sing requiem dirges.

A cigarette fiend proposes to investigate the boost prices in cigarettes.

Cigarettes not being a necessity of life—but rather a killer—prices might be boosted out of sight, and help to save life.

"Why grow old?" asks a Paris physician, who proposed to graft into humans a juvenile life germ.

Doughnuts to lollypops the physician himself is a tottering old chappie.

Seven thousand acres have been released near Ponoka by the government.

Government is making ample provision for Ponoka's future increase—another oil boom is in sight.

The Ross rifle factory is to be abolished and the site used for some other purpose.

Why not erect a memorial to the brave Canucks who laid down their lives using the Ross rifle.

A party of C.N.R. surveyors were in town this week, staying at the hotel. They have been surveying a route some 30 miles to the north of here, but we were not able to ascertain what particular branch the survey was for, as the surveyors themselves "didn't know."

We did learn, however, that grading on the C.P.R. Edmonton-Swift Current branch, which comes right through Chinook, will be started early next spring. This was promised by Pres. Beatty for the 1919 program, so it is pretty sure for next spring.

WINS A GOLD BRACELET

Some few weeks ago, the management of the Petrie Mfg Co., of Hamilton, Ont., offered prizes to the boys and girls for the best essay on "What they intend to do when they grow up." May Todd, aged 10 years, daughter of Mr. and Mrs. W. A. Todd, of Chinook, has been awarded first prize for girls. May is to be very heartily congratulated on her success, more so on account of the very stiff competition that she had to contend against.

The letter sent by the management of the Petrie Mfg Co., appraising May of her success, is so full of good and sensible advice, that we take the liberty in publishing it in full: May Todd, Chinook, Alta.

Dear Friend,—Out of a large number of contestants you have been selected winner of the first prize for girls. A nice gold bracelet is being sent to you by another mail. It has indeed been a difficult matter to make the selection as so many had clear ideas as to what they intend to do when ladies, that the difference was largely one of expression.

I am pleased to see that farming, by large odds, was the most popular choice among our farm girls, and in this I am sure they have made a wise selection. From long experience spent in close contact with farmers and their families I am certain that greater success, comfort and happiness is obtained in that calling than any other.

It is true that city positions in offices, nice clothes, and amusements may dazzle the eyes of the unthinking, but taking an average, farm girls have a happier, more contented and better life.

You will meet lots of trials and probably some reverses in following your calling, but with your eyes on success, diligence at school, and faithful helping of others, you will have no reason to regret you have made your selection in the Magnet Cream Separator Competition.

Yours truly,
A. B. PETRIE,
President and General Manager

FARMERS AND RELIEF

A Very Important Convention of U.F.A. Bodies Held in Chinook re Relief

Petitions Government For Help in Many Needy Cases

A meeting, convened under the auspices of Chinook Local of the U.F.A., was held in the school-house, Chinook, on Friday evening, to discuss the urgency of government relief, made necessary in numerous cases through successive crop failures. Invitations had been sent to the various farmers' organizations throughout the district contributory to Chinook, and representatives were present from a wide area. A number of merchants and others interested were also present, and altogether the meeting was fully representative of all interests.

The president of the Chinook Local officiated as chairman, and after calling the meeting to order invited Mr. Proudfoot to explain the aims and objects of the gathering.

Mr. Proudfoot then gave a detailed statement of the reasons which had led to the meeting on that evening. There was undoubtedly widespread suffering caused by repeated crop failures, and the urgent need of relief in many cases was so imperative that the executive of Chinook Local had taken upon itself the onus of calling a general meeting to discuss the question, and resolve upon a course of action.

Municipal bodies already possessed powers under the Municipal Act to supply persons with feed and seed, but any other relief in the shape of groceries, coal, etc., would require—if the municipalities were to handle it—an amendment to the Municipal Act. In districts where no municipality existed the government would have to administer relief as on former occasions.

He outlined several schemes of relief which might be successfully applied to the problem, and hoped that the discussion to be inaugurated that evening would be productive of speedy relief.

A lengthy discussion then took place by several present.

It was estimated that about 20 per cent. of the people in this part of the country would need relief.

All the speakers emphasized the fact that relief was both necessary and urgent. It developed that the farmers in the district to the extreme south of Chinook were the greatest sufferers, as in many cases crops did not even produce feed. Several extreme cases of need were cited and the speakers advocated laying the matter in the most emphatic manner, before the Provincial Government, as the first and best of relief measures.

The following resolutions were passed unanimously:

"Whereas, it has been emphatically demonstrated to us that some form of relief must be provided at once for many people in this part of the drought area of Alberta, we, the representatives of the various U.F.A. locals in the vicinity of Chinook, Alta., and other residents, in meeting assembled, this 17th day of October, 1919, do hereby petition the government of Alberta as follows:

1. "That the Municipal Act be so amended that relief other than seed and feed may be given on the same basis as seed and feed are now given

2. "That the relief for the unauthorized districts be handled by the Government themselves in the same manner in which seed and feed is provided now in those districts.

3. "That provision be made at once for the needy in this district, the Dominion Government being requested to assist where necessary."

It was further resolved, that the municipal districts tributary to Chinook be asked to co-operate in this matter.

The following committee was appointed to follow up the matter of government relief, with power to take any necessary steps to accomplish the purposes of this meeting, majority to be a quorum: Messrs. Sibbald, Watson, Thomas, Peterson, Shortt, Lensegraff, Proudfoot, Yake.

The secretaries of the different Locals to be asked to bring all needy cases to attention of the committee.

It was further resolved to form a U.F.A. District Association, as provided for in the Constitution, the membership to consist of one or more representatives from each Local wishing to enter the association, for the purpose of following up matters of common interest to the district.

Meeting adjourned.

Come to Salmon Arm, B. C., for the best climate, fruit, and mixed farms. No irrigation or crop failure. Write F. Haydock for list and particulars.

Keep in mind the pie social and dance to be held in the Chinook school auditorium, on Halloween. A fine program and excellent music. Everybody welcome

The anniversary of "Armistice Day" will be celebrated in Chinook by a grand banquet and dance given by the citizens of Chinook and district, to all the returned soldiers and soldiers' wives in the district on the evening of Tuesday, Nov. 11th, 1919. The banquet will be held in the school auditorium at 6:30 p.m., and following the banquet a dance in Arms' hall at 9:30 p.m.

A cordial invitation is extended to every veteran in the district to be our guest.

The dance is open to the public and everybody is welcome.

A good time is looked for.

REX VS. FRED BELMONT

As noticed in the Advance some weeks ago, Fred Belmont of Chinook was convicted and fined by M. J. Hewitt and J. W. Yake, two Justices of the Peace, for having in his possession an apparatus suitable for the manufacture of spirits, contrary to the Inland Revenue Act.

L. E. Ormond of Chinook, solicitor for Belmont, appealed from this conviction by way of a certiorari.

The case was heard by Mr. Justice Walsh, recently, Mr. Ormond appearing for Belmont, and Mr. H. S. Patterson, of the firm of Patterson & Macdonald, of Calgary, appearing for the Inland Revenue Department.

The learned Judge decided that there was not sufficient evidence to sustain the conviction, and it was accordingly quashed.

The chief grounds taken by the Judge in his decision were that there was no evidence to connect the accused with the manufacture of spirits, and no evidence whatever adduced on behalf of the prosecution to prove that the liquid manufactured was intoxicating liquor.

Loan Drive Starts Monday

Canada's big drive for the \$300,000,000 that will enable her to pay her war bills and carry the country safely through the reconstruction period with no cessation of the present prosperity, will commence on Monday.

The campaign will last three weeks. During that time it will be carried into every corner and centre of Canada. If you are not visited by one of the army of canvassers, you will be able to make your investment in this new issue by obtaining application forms from any Victory Loan committee or from the branches of any chartered Canadian bank.

Of the \$300,000,000 and over that will be raised every cent will be spent in Canada.

The need of the money is very urgent.

MAGIC BAKING POWDER

Contains no alum

We unhesitatingly recommend Magic Baking Powder as being the best and purest baking powder possible to produce. It possesses elements of food that have to do the building up of brain and nerve matter and is absolutely free from alum or other injurious substitutes.

Proportional Representation

-No. 4

Opponents of the adoption of the Proportional Representation system in connection with parliamentary legislative and municipal elections, to which attention has been devoted in this series of articles, urge:

1. It is too complicated for the voters to understand.

The following was the percentage of spoiled ballots in some elections recently held under the P.R. system: Sligo Municipal election: Votes cast, 2,251; spoiled ballots, 43. Of this latter number, 24 only were attributable to the new system, whilst 19 were declared invalid for other reasons. The percentage of spoiled papers due to the P.R. system was, therefore, just over 1 per cent.

Edinburgh election: Votes cast, 124,107; invalid from all causes, 2,750; percentage of invalid votes, 2.2.

2. The method of counting the votes is too elaborate and the process takes too long.

The following comments from places where P.R. has been tried may be taken as indicative of feeling on the question:

(a) Glasgow: The returning officer in one day counted no fewer than 124,000 votes, spread over seven electoral divisions of the city.

(b) Calgary: It took 2½ times as long to count ballots as under the old system.

(c) Kalamazoo: It took 6½ hours to count 4,461 ballots.

(d) Of the election in Sligo, "The Champion" of that city says: "The system has justified its adoption. We saw it work; we saw its simplicity. We saw its unerring honesty to the voter all through. . . . It is as easy as the old way; it is a big improvement, and it is absolutely fair. . . . It is very plain, very simple."

However, even if two or three days were consumed in counting the ballots, there are still over 36 days left in the year for the Government to function, and the new Parliament, Legislature or Council, never takes office immediately. If P.R. secures more representative government, would not the time be well spent?

Again, is the ordinary voter concerned with the actual work of counting the ballots? Is not this done by appointed expert officials now? Could not the P.R. method be carried on by such officials also, and possibly by even more expert men than are now selected as returning officers?

3. It divides the electorate into groups and fosters group feeling. Is not group feeling more apt to be inflamed by lack of adequate representation? In cities where the ward system prevails, this same group or sectional feeling is cultivated, whereas under P.R. the ward system can be done away with while at the same time making adequate provision that minorities can secure their proportionate representation in the Council.

4. P.R., by giving complete representation to the people, will weaken government and make it unstable.

This criticism is not borne out by experience where P.R. has been tried. The strength and stability of a democratic executive depend upon two factors—its personnel and its ability to interpret the will of the people. P.R. tends to strengthen the personnel. M. Georges Lomond, the well-known Belgian M.P., states that under P.R. not only were all parties represented in Parliament, but "they were represented by their ablest men and leaders, whilst under the former majority system prominent men passed half their lives outside the House. Parliamentary life has consequently gained in authority." "Perhaps the principal benefit of P.R.," he adds, "has been that political life, which has been intensified everywhere, has also been purified, the weapons employed being generally more courteous and more dignified."

Further, a democratic government will be stable if it interprets the will of the people correctly, and P.R., by making our public bodies completely representative of the people, places in the hands of governments a more effective instrument for ascertaining what that will is. This explains why P.R. has rendered government in Belgium stable.

There are many other objections advanced against Proportional Representation, but these are the chief ones, and certainly they do not hold against the manifest fairness of the P.R. method to all people in the election of their representatives.

As pointed out in the first of these articles, the principle of Proportional Representation has now been endorsed in Canada by the National Liberal Convention, the Great War Veterans Association, the Canadian Council of Agriculture, the Labor party, Social Service Councils, and numerous other reform organizations. It was endorsed by the recent Industrial Conference at Ottawa, and the Government has announced its intention of having an exhaustive inquiry made with a view to its adoption in Federal Parliamentary elections.

People everywhere should, therefore, embrace every opportunity that presents itself to study the question and become as fully informed as possible in regard to it, as it is practically a certainty that it will be adopted in Canada in the not distant future. It is to encourage such closest study that this series of articles has been written.

Worms, however generated, are found in the digestive tracts, where they set up disturbances and discomfort to the localities. There can be no comfort for the little ones until the harmful intruders have been expelled. It is to the mother that this purpose can be had than Miller's Worm Powders. They will immediately destroy the worms and restore the conditions that were favorable to their existence.

A Politic Report

Traffic Cop: "Come on. What's the matter with you?" "Truck Driver: "We well, thanks, but me engine's dead."

Minard's Liniment for sale everywhere.

Wool Brings Satisfactory Price

W. J. Stark, secretary of the Alberta Provincial Sheep Breeders' Association, received a check for \$65,765.20, being a remittance from the Canadian Co-operative Wool Growers Ltd., of Toronto, on account of the wool shipped them for sale by the local association, and which was contributed by 324 sheep owners in northern Alberta and six from British Columbia. The wool has not all been sold as yet, and this remittance is on the basis of 8c below the market price on each grade. When the balance of the wool is sold, the contributors will be sent the amounts necessary to balance their accounts. The wool which has been sold has brought a very satisfactory price; some of the fine medium combing has been sold at 68½ cents per lb., the fine medium clothing brought 60 cents.

Dam is Completed

Canada Land Company Will Market Farms Next Spring

Water is now running over the south dam of the Canada Land and Irrigation Company's reservoir at Lake McGregor, nine miles southwest of Lomond, Alberta. D. W. Hays, general manager of the company, states that prospectors are good for the colonization of large tracts of irrigated land in the district next spring.

Had a Very Bad Attack

OF

Bowel Complaint

IT WAS CURED BY

DR. FOWLER'S

EXTRACT OF WILD STRAWBERRY

Any one suffering from bowel complaints such as diarrhoea, dysentery, colic, cramps and pains in the stomach, summer complaints, etc., will find that Dr. Fowler's Extract of Wild Strawberry will give quicker and more permanent relief than any other remedy on the market today.

This old tried and proven medicine has been on the market for the past 34 years. You don't experiment when you buy it. Surely the test of time proves this.

Mrs. Daniel Hartwick, Mountain Grove, Ont., writes: "I used Dr. Fowler's Extract of Wild Strawberry and have found that it is a good remedy. When my little girl was 2½ years old she had a very bad attack of bowel complaint. Nothing prescribed by the doctor seemed to do her any good. She got worse, until we thought we would lose her. I got a bottle of Dr. Fowler's, and she soon found relief. Ever since then, I have should not be without it in my home."

Price 35 cents a bottle; put up only by Dr. J. M. Milburn Co., Limited, Toronto, Ont.

Prince Becomes Butter Dealer

To show his real patriotism, Prince Louis of Bourbon, pretender to the French throne, has just entered the butter trade. He says he will fight profiteering, and if he can reduce the cost of butter, he will feel he has done his bit for the people.

Comfort for the Dyspeptic

There is no ailment so harassing and exhausting as dyspepsia, which arises from defective action of the stomach and liver, and the victim of it is to be pitied. Yet he can find ready relief in Parment's Vegetable Pills, a preparation that has established itself by years of effective use. These pills that are widely advertised as the greatest ever compounded, but not one of them can rank in value with Parment's.

Visitor (to sweet child whose mother has left the room for a moment): "Come here to me, my dear!" "Sweet Child: "No, I mustn't do that. Maamma told me I must stay sitting in the chair, because there's a hole in the cushion!"

BARGAINS IN STOCK

Won't interest the man who is nursing a bunch of sore corns. Give him a bottle of Putnam's Corn Extractor. It is painless, takes out the corn, cures in one day. Beware of substitutes for "Putnam's." It is the best, 25c at all dealers.

Missed a Mixup

An amusing incident in which the chauffeurs of M. Clemenceau and M. Millerand, the Governor-General of Alsace-Lorraine, played the principal parts, occurred recently in Paris. The chauffeurs were driving their distinguished employers through one of the main thoroughfares of Paris the other day, when in some way they nearly collided. Both drivers were convinced the other was to blame, and with much gesticulation began to abuse each other volubly. An unpleasant scene was developing when the chauffeurs recognized that the men they were driving were saluting each other from the carriage windows with every mark of amity and profound respect. The drivers' quarrel terminated abruptly, and with a superb air of dignified indifference they continued their journey.

When a man is sick he wonders if there is another man on earth capable of continuing his business in case he shuffles off.

Canadian Lumber In Britain

Prejudice Against Frame Houses Is Giving Way in Old Land

LONDON.—The sale of wood houses in Britain has become so great that it is unlikely any local objections will have any weight against the intention of the ministry of health to over-ride existing restrictions. A number of municipalities in Scotland have already taken steps to repeal restricting regulations. It is probable Scotland may lead Britain in wood construction.

It is understood Canadian parties are interested, and an estimate of the plans has been submitted to the ministry of health housing committee, stating that the buildings proposed by the ministry's architects would be a discredit to Canadian industry, being ugly in appearance, inconvenient in design and will generally defeat popularity.

The raising of restrictions, however, will give Canadian house-builders a vast market if they co-operate. They propose supplying Britain and Europe with materials for mill-owners' houses. Complete enquiries as to Canadian houses have been received from France, Belgium, and Mediterranean countries, even as far east as the Palestines. The Montreal Star understands that one European order for 20,000 mill-cut houses has already been booked. Enquiries show that prospective orders in the near future will be well up to \$100,000.

British Salvaging Ships

Occasionally Divers and Surface Helpers Bring Up a German Submarine

The British are energetically at work undoing to a certain extent the work of the U-boats. Already it is reported that ships to the value of \$250,000,000 have been raised by the Admiralty's salvage department. In the case of colliders and some other vessels, the cargoes also are regained. Of course, costs of salvaging are heavy, but the profits are sufficient to warrant the effort.

No unusual methods are employed by the salvaging departments. Steamers with their auxiliary pumps and powerful lifting lighters are used now as heretofore. Until new methods are evolved there will be many ships in deep water which will stay there, but the majority of the sinkings were in comparatively shallow water. It even has been said that the Lusitania might be raised or, at least, the hull in her cargo recovered. In this connection it is interesting to note that \$9,500,000 worth of bullion recently was taken from the wreck of the Laurentic.

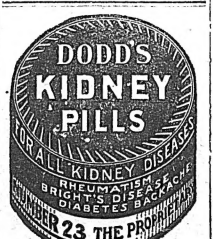

Occasionally the divers and their surface helpers bring up a German submarine, and perhaps a number of secrets of those craft have been revealed to the Admiralty. While the submarine fleet was surrendered after the armistice, it is well known that the Germans had removed many devices which were peculiar and valuable accessories to these craft.

Minard's Liniment Relieves Neuralgia.

Bela Kun to Face Trial

For Incitement to Murder, Robbery and Forgery

Bela Kun and his associates are to be prosecuted for incitement to murder, robbery and forgery. This man's name would be Adolf Bert Cohen, in English, Kun was unheard of in Hungarian politics until last year. He is 37 years old and married. Before the war he was secretary of the local workmen's union in Lacszywan, near Arad. He was arrested for stealing the union funds, 30,000 kronen, and prosecuted. On his promise to pay back the money in instalments he was released. When the war started he was mobilized with the rest of the Hungarians. He either deserted or was taken prisoner by the Russians, for about one year ago he was in Petrograd acclaimed as one of the brightest pupils of Lenin. Supplied by funds from the Bolshevik treasury, he returned to Hungary and organized a reign of terror, organized the radical mob, and entered the field against the Czechs, Poles and Rumanians.

HOW TO "BE FIT" AT SIXTY

BY DR. LEE HERBERT SMITH

As our boys "come marching home," they brought a certain red-blooded doctrine, and showed us the glory of a perfect body. They will show us how to "keep fit," even if we have passed middle life and are beyond the athletic stage. For the tired business man, the man who feels the daily grind and the nightly lag, has meager appetite, headaches, nerves unstrung, is gloomy, ending in a soggy brain, try the right way. Get out of bed, open the window, breathe deeply, exercise the army "setting-up" exercise or use dumb bells, until in a warm glow.

Before breakfast take hot water, and occasionally ester oil or a pleasant laxative made

up of May-apple, aloin, jalap, and sold by all druggists as Dr. Pierce's Pleasant Pellets.

As Prof. Strauss says, "The excretion of uric acid we are able to effect by exciting diuresis." Drink copiously of soft rain or distilled water, six or eight glasses per day, hot water before meals, and obtain Anurie Tablets, double strength, for 50 cts., at the nearest drug store and take them three times a day. If you want a trial package send 10 cents to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y.

"Anurie" (anti-uric-acid) is the recent discovery of Dr. Pierce and is much more potent than lithia, for it will dissolve uric acid as hot tea dissolves sugar.

Natural Salt Beds in Alberta

Provincial Government Developing Immense Deposits Near Fort McMurray

Drilling for salt at Fort McMurray, Alberta, has just been commenced, according to an official of the Department of Mines.

An outfit, with seven men, has just been sent in by the provincial government. The deposit underlies the town of Fort McMurray, so is feasible from the transportation standpoint.

According to previous investigations, there is a bed 180 feet deep, lying 480 feet under the surface. Professor Allan, of Alberta, was sent in by the provincial government a couple of months ago, and he reported very favorably.

It is not decided whether the government will mine salt, supposing everything is as expected, or whether it will turn the work over to a company.

Whether the corn be of old or new growth, it must, said to Holloway's Corn Cure, the simplest and best cure offered to the public.

Canada's forests embrace 350,000 square miles of pulpwood timber, estimated to yield 1,033,370,000 cords of pulpwood.

don, in memory of Lord Kitchener. It will cost \$50,000.

A special chapel will shortly be installed in St. Paul's Cathedral, London.

CLARK'S

Spaghetti

with

Tomato

Sauce

and

Cheese

is really

delicious.

Ready to serve, just heat and eat.

W. CLARK, LIMITED, MONTREAL

Strikers Denounced By Lloyd George

London.—Premier Lloyd George surprised his countrymen, as he frequently does, by denouncing the railwaymen's strike as "Prussianism" and "another effort to hold up the community and strangle it into submission," at the Lord Mayor's Mansion House luncheon in honor of Field Marshal Allenby.

The occasion was an unusual one for such a topic, but the Premier has a habit of doing unusual things at unusual times. Near him sat Emil Paisal, son of the king of the Hedjaz, in white robes, and the Archbishop of Canterbury with an array of other military and civilian notables, such as only London can muster on ceremonial occasions. They expected nothing more sensational than compliments to the conqueror of Palestine.

"The nation means to be master in her own house," Mr. Lloyd George declared, "a just master, a fair master, a generous master, but always master in her own house."

This was naturally accepted as a proclamation of the Premier's view that the country won a victory over the strikers.

J. H. Thomas, secretary of the National Union of Railwaymen, and leader of the recent strike, speaking at Albert Hall, dwelt on the settlement of a compromise, and issued a statement appealing for reconciliation and a burial of bad feeling.

Labor papers appear to differ with Mr. Thomas as to some aspects of the strike settlement. When Mr. Lloyd George makes an important speech, newspapers try to read between the lines to discover his political purposes. The general interpretation of this speech is that the Premier has broken with labor unions and wants to draw to his support the middle classes, who apparently tended to drop away from him as a result of the recent campaign over the alleged governmental extravagance.

Argentine Will Give Credit

Government Accorded to Request of France and Italy
Buenos Ayres.—Declaring that large stocks of "Argentine" grain would not be sold unless the government "accorded" to the request of France and Italy for a credit of \$200,000,000 with which to purchase cereals, a delegation representing the chamber of commerce of Rosario, a great grain centre, requested President Irigoyen to expedite the loan by calling an extra session of congress. The regular session adjourned recently without acting on the loan. President Irigoyen indicated he would endeavor to convene congress as early as possible and would recommend the loan-as business of the first importance.

Bulgaria Seeks Time Extension
Paris.—The supreme council will meet to reply to the request of Bulgaria for an extension of ten days to the time granted it for presentation of its observations on the treaty handed to the Bulgarian commissioners September 19.

London.—The Cork Development Association has received a cablegram from Henry Ford stating that he is considering running a line of steamers to Ireland.

Move to Regulate Price of Clothing

Toronto.—Immediate and effective action to regulate clothing prices was forecasted by Commissioner Murdoch of the Commerce Board, at the conclusion of the board's investigation into clothing prices here. Col. W. H. Price, government counsel, addressed the commissioner, calling attention to evidence which he said warranted action on the part of the board, and Commissioner Murdoch replied:

"I am firmly convinced that something should be done to reduce the price of clothing, and so far as I am concerned, as one member, I will hope to see something done promptly and effectively."

Commissioner Murdoch said he concurred in Col. Price's declaration that there had been too much profit made by some of the clothing houses whose affairs had been investigated. "And I am further of the opinion," he went on, "that there is more than net profit involved, that there is real

Plan Reform in Election Laws

Double Representation Not Permissible If Amendments Are Approved

Ottawa.—Double representation of constituencies in the Dominion parliament will not be permissible in future if amendments to S. W. Jacobs' bill to change the House of Commons Act agreed to by the privileges and elections committee are approved by parliament.

Mr. Jacobs' bill, as originally introduced, provided that a member elected for two seats must, within thirty days, make a choice as to the seat he proposes to represent.

The committee, after considerable discussion, agreed to an amendment providing that no person shall be eligible for election to the House of Commons in more than one electoral district at the same time. The further provision is made that if a man accepts nomination in two constituencies such nominations will be null and void. The law will apply to by-elections as well as to general election contests.

The clause in Mr. Jacobs' bill, which made provision for the filling of vacancies which occurred within 60 days, was also changed. The amendment provides for the filling of such vacancies within six months.

Strikers Granted Increase

London.—A court of arbitration considering the demands of the trammen and bus-workers in London and the provinces, has made an award granting an increase in wages amounting to four shillings weekly to those over 18 years of age and two shillings to those below that age. The recent agitation among the men was for an increase of 12 shillings weekly.

Prohibition Has Large Majority

Christiania.—The vote by which Norway adopted the prohibition of whiskey, brandy and other strong liquors in the referendum was 428,455 in favor of prohibition and 284,137 against.

Christiania was strongly against the proposition, only 18,500 voting for it, as compared with 70,000 in opposition. The measure does not affect wines and beers.

Dominion Guards Unlikely

London.—The London correspondent of the Manchester Guardian intimates that the suggested establishment of a battalion or regiment of Dominion Guards for an addition to the home brigade has been found impracticable, but possibly the idea of attachment of recognized Canadian, Anzac or South African units may be attainable, though presenting considerable difficulties.

In Madras the tanning of snakeskins for the manufacture of women's belts has become quite a profitable industry.

London.—Parliamentarians say the Irish Bill will be the feature of the new session of parliament, and the cabinet is now considering one drafted on lines of dominion home rule, but with suggested alterations - that any county may stand out, or Ulster counties be all included and have their own secretaries of state.

King Albert Runs Train
Chicago.—The King of the Belgians ran the engine of his own train for ten miles. The special train on which the King and his party are travelling westward was stopped at Wauson, Ohio, while His Majesty climbed into the cab of the engine and took over the throttle from the grimy pilot. The King, who has a thorough knowledge of locomotive engineering, ran the heavy train for 10 miles without a jolt, then he stopped the engine and returned to his car.

Fatal Tornado in Kansas
Holsington, Kas.—Two persons were killed and 25 injured, some of them seriously, and property damaged, estimated at a quarter of a million dollars, resulted when a tornado struck here and swept a path of destruction several blocks wide through the business and residential section of the city.

Police Reach Budapest

Paris.—The arrival of 1,800 British soldiers forming part of the international detachment to take over the police service at Budapest after the departure of the Rumanians, is reported in dispatches from the Hungarian capital. Two thousand Italian soldiers are also expected.

Amsterdam.—The former German emperor will remove from Amerongen about December 16, and take up his residence at Doorn.

Nationalists Capture Konieh

Apprehension That Turkish Throne May Be In Danger

Paris.—Konieh, an important railroad centre, is in the hands of the Turkish Nationalist troops.

This city, which in the days of Roman power was known as Iconium and was the capital of the province of Lycaonia, stands in a position which virtually dominates South Asia Minor. Its capture appears to indicate that Mustafa Kemal is in control of the vast region stretching from Konieh from the southwest to Erzerum, the principal city of Turkish Armenia, a distance of 425 miles. It is said the fall of the Turkish cabinet was caused by the capture of Konieh, and there seems to be some apprehension in some quarters that the Turkish throne may be in danger.

On the other hand, French circles point out that Djemal Pasha, the newly appointed Turkish minister of war, is a political ally of Mustafa Kemal.

Great Britain began to withdraw her troops from Armenia in August, and it is probable this movement is now far advanced. France has forces in Syria, while Greece and Italy have small detachments at various points along the coast of Asia Minor.

None of these nations, however, appears to have sufficient forces to conduct a campaign in the interior of the country. Great Britain's army in Mesopotamia and in Palestine, to the east and south, seems to be too far away to mount the spread of the Turkish nationalist movement, led by Mustafa Kemal.

Prohibition in Norway

Despite This, Arrests for Intoxication Have Been Increasing

Christiania.—Vat-time prohibition, operating since December, 1916, and forbidding the sale and private importation of spirits and strong liquors has been made permanent.

Despite this prohibition, arrests for intoxication have been steadily increasing throughout the country, and in some places have been higher than before the war-time prohibition was put into effect.

Substitutes for liquor, especially denatured alcohol, are being used everywhere. Illegal distillation also is increasing, especially in the rural districts.

It is feared that France, Spain and Portugal, from which countries liquor was imported, may retaliate with a tariff on Norwegian products, such as timber and fish, thereby injuring especially the Norwegian fish trade, 60 per cent. of which goes to Portugal.

Barrage Removed From North Sea
Washington.—Removal of the great North Sea barrage laid by the United States navy during the war has been completed.

This was disclosed when Secretary of the Navy Daniels made public a cablegram of congratulation sent to Rear-Admiral Strauss, who commanded the force which since last October had been engaged in the hazardous task of sweeping the 50,000 mines from the sea.

Only one serious accident attended the work, one of the sweepers being blown up with the loss of several lives.

King Albert Runs Train
Chicago.—The King of the Belgians ran the engine of his own train for ten miles. The special train on which the King and his party are travelling westward was stopped at Wauson, Ohio, while His Majesty climbed into the cab of the engine and took over the throttle from the grimy pilot. The King, who has a thorough knowledge of locomotive engineering, ran the heavy train for 10 miles without a jolt, then he stopped the engine and returned to his car.

Fatal Tornado in Kansas
Holsington, Kas.—Two persons were killed and 25 injured, some of them seriously, and property damaged, estimated at a quarter of a million dollars, resulted when a tornado struck here and swept a path of destruction several blocks wide through the business and residential section of the city.

Police Reach Budapest

Paris.—The arrival of 1,800 British soldiers forming part of the international detachment to take over the police service at Budapest after the departure of the Rumanians, is reported in dispatches from the Hungarian capital. Two thousand Italian soldiers are also expected.

Amsterdam.—The former German emperor will remove from Amerongen about December 16, and take up his residence at Doorn.

Concerning Shipping Supervision

Co-operation to Be Introduced in Control of Ocean Tonnage

Ottawa.—Replying to a question by J. E. Armstrong, Sir George Foster, Minister of Trade and Commerce, stated that the Dominion Government has called the Imperial Government's attention to injustices in connection with the supervision by the British Ministry of Shipping in the employment of vessels under charter by Canadian shipping interests.

In reply to another question, Sir George stated that the Canadian Government will co-operate with the Imperial Government and other overseas dominions in considering the question of the supervision and control of ocean tonnage between the different parts of the British dominions.

In reference to a report of a British royal commission in favor of government supervision in transatlantic shipping, the minister stated that this report will probably form the subject matter of consideration at the next Imperial conference.

Heavy Expenditures

Deputy Minister of Finance Submits Figures to Committee on Soldiers' Civil Re-establishment

Ottawa.—A presentation of the government's obligations in regard to the payment of perhaps \$200,000,000 re-establishment grant in addition to the burdens already to be borne, was given to the special committee on the soldiers' civil re-establishment by T. C. Boyle, deputy minister of finance. Since March 31, 1914, the public net debt has increased 580 per cent. from \$335,996,000 to an estimate for 1919-20 of \$1,950,000,000. Pensions are estimated this year at \$30,000,000; land settlement, \$25,000,000; and soldiers' civil re-establishment, \$10,000,000. Interest on the public debt has risen from \$12,993,000 in 1913-14 to \$102,762,000 this year.

War expenditures for 1919-20 were estimated at \$350,000,000 exclusive of pensions, and this year's consolidated revenue receipts were estimated at \$244,000,000.

For Sweeping Reform

National Women's Council Present Views on Many Subjects

Calgary.—Resolutions asking that second offences for bootlegging be punishable by jail sentences, that parental rights be established in the province, that widows be given greater power under the Dower Act, that a living wage be incorporated in the Factories Act, that hotels and lodging houses be licensed to bring them under police regulation, and that marriage licenses be issued only from courthouses by responsible persons and that the lists be published every day, were passed by the provincial executive of the National Council of Women, which met here recently.

Will Investigate Irrigation in West

Ottawa.—The agriculture committee of the commons recently gave consideration to the question of irrigation in the dry areas of the prairie provinces. During the discussion the important announcement was made by Professor J. A. Grisdale, Deputy Minister of Agriculture, that the Department of Agriculture, realizing the importance of this matter, is undertaking to carry on a thorough inquiry into the whole question, which may lead to important results.

Italy Ratifies Peace Pacts

Rome.—King Victor Emmanuel has ratified the German and Austrian treaties by decree.

The Giornale d'Italia says that each decree contains two articles, the first authorizing the government to execute the treaty fully and the second setting forth that the documents be presented to parliament to be converted into law.

Irish Home Rule Bill

London.—Parliamentarians say the Irish bill will be the feature of the new session of parliament, and the cabinet is now considering one drafted on lines of dominion home rule, but with suggested alterations that any county may stand out or Ulster counties be all included and have their own secretaries of state.

Ready to Ratify Pact

London.—Great Britain's ratification of the Peace Treaty, the Foreign Office says, awaits only the King's proclamation. All the dominions have ratified the treaty, the Australian House on September 15 and the Senate on October 15.

W. N. U. 1285

Right of Provinces To Enforce Prohibition

Gen. Mangin Will Assist Denikine

He Will Be Accompanied By Russian Ambassador to Paris

Paris.—General Mangin, whose recall to Paris from command of the eighth army has just been announced, is to proceed to south Russia and join General Denikine, the anti-Bolshevik commander there, according to L'Eclair. He will be accompanied by Basile Makhaloff, Russian ambassador to Paris, his mission being to co-ordinate the policy of the anti-Bolshevik government.

The eighth and tenth French armies are being broken up as units, and Generals Mangin and Gerard, who commanded them, have been recalled and placed at the disposition of the minister of war. Newspapers are greatly interested in this step, and explain it differently. While the opposition press intimates that General Mangin may be out of favor, which it insists is undeserved, a majority of the newspapers declare the move is only an administrative measure resulting from the grouping of occupation groups in the Rhineland. It is said the eighth and tenth armies will soon be re-formed into a single corps, which will be commanded by General Degoutte.

Want Standardized Parts

Ottawa.—The Commons' committee on agriculture received the report of the manufacturers' committee dealing with the proposal that the standardization of parts of agricultural implements should be agreed to in order to make it more convenient and save cost to the farmers. The report pointed out a great many difficulties in the way of successfully carrying out the plan.

After some discussion it was agreed not to allow the matter to drop, but to continue the discussion with the manufacturers during the parliamentary recess.

Quantity of Liquor Seized

Winnipeg.—Intoxicating liquor, whiskey, Scotch whiskey, Irish whiskey, cherry whiskey, gin, brandy and rum to the estimated value of \$20,000 was seized by the city police morality department at the corner of Notre Dame avenue and Charlotte street. S. Gold, head of the firm of Gold & Cheick, alleged to have been carrying on the business of wholesale bootlegging, was filling bottles with liquor, surrounded by many modern appliances to facilitate, when arrested.

General Gouraud High Commissioner

Paris.—General Gouraud, whose brilliant defence in the region east of Reims baffled General Ludendorff in an attempt to crush the French army on the offensive of July, 1918, has been appointed high commissioner of France in Syria and commander-in-chief of the French army in the east. His appointment will be officially made public in the Journal Official.

California to Entertain King Albert

Santa Barbara, Calif.—Wild boar hunting on Santa Cruz Island, seaplane flights, motor jaunts about the city, a banquet and other features are on the program to be tendered King Albert and Queen Elizabeth of Belgium and members of their suite upon arrival here.

Increased Gratuities A Heavy Burden

Ottawa.—A further statement of the difficulties facing the government which make payment of \$200,000,000 or more in gratuities a difficult matter for the administration to face, was placed before the special committee on soldiers' civil re-establishment by Sir Thomas White, former minister of finance.

The former minister of finance was calling attention to the many heavy expenditures which the government was called upon to face from the forthcoming Victory Loan. Without any new debts incurred, the major portion of this loan would be taken up in bank debt and other obligations.

"Canada's financial position," he said, "while it should not be called critical, is still serious because of five years' war expenditure to call for most careful administration."

"The policy of all the nations

Ottawa.—Legislation making it possible for a province to have absolute prohibition, either of importation or manufacture, or both, of spirituous beverages, was introduced in the house by Hon. C. J. Doherty, Minister of Justice. Before a province can bring about bone-dry conditions, however, there must be a plebiscite taken under the authorization of the resolution amendment by the provincial legislature. When this has been done, and a plebiscite is only taken, then whatever the plebiscite provides for will be brought about by proclamation, issued in accordance with the proceedings provided in the Canada Temperance Act, of which the bill introduced is an amendment.

Replying to a series of questions by W. F. MacLean, the minister explained that the present law in Ontario in regard to which a referendum is being taken does not deal with the question of the importation or manufacture of liquor. The provincial law, he said, takes the position that they cannot deal with that question. "This," added the minister, referring to the bill he had just introduced, "would be a method whereby in virtue of Dominion legislation becoming operative by the vote of the electorate of a province, importation into that province or manufacture in it would be prohibited."

Italians Are Excited

By Warnings With Regard to Situation at Fiume

Rome.—Much excitement in political circles and extended comment in the press has been caused by the reported receipts of warnings from Great Britain and the United States to Italy with regard to the situation at Fiume. It is declared that the British warning stated in effect that "the present illegal situation" at Fiume should continue Italy would "run the risk of being put out of the alliance and the peace conference," and that it was received a few days after a similar warning from the United States.

The Tribune prints a violent article stigmatising the warnings and saying that the British and American warnings should not be addressed to Italy, but to d'Annunzio, as "Fiume is not Italy; in fact, Fiume is fighting against the Italian government which, together with the other allies, is unable to silence the Adriatic problem after the disavowal of the pact of London."

Japan to Ratify Pact

Paris.—Ratification by the Japanese parliament of the German peace treaty is not required by the constitution of Japan, according to information from peace conference circles. Signature by the Emperor after consultation with the private diplomatic council constitutes the necessary ratification, and this is expected to take place by October 15.

Will Release Poles

Warsaw.—A Polish-German agreement has been signed by the Polish delegation at Berlin providing for the release of Poles interned in Germany for their military, political or national activity. The revoking of all sentences imposed on Poles and free return of the agreement which concerns Upper Silesia as well as Poland. The agreement will be in force immediately after its ratification.

which were belligerents will be toward retrenchment for the next few years."

In regard to the forthcoming loan, Sir Thomas said he had no misgivings. It would probably be well over-subscribed, but he could see that, from present indications, a further loan would be necessary next year. Canada had had to borrow money to finance purchases by Britain and her allies in order that Canada's own trade might not suffer.

"I do not see how it would be possible for the government to raise any such further sum as is suggested if its credit is to be maintained," said Sir Thomas. The ex-minister expressed the view that should the government decide to grant a large amount of additional aid to soldiers, the money would mostly have to be produced by domestic loans.

Organization for 1919 Victory Loan Will Be Most Complete

The interest taken in the 1919 Victory Loan is growing daily. Business men throughout all Canada, and particularly in Southern Alberta are banding themselves together for the purpose of making Canada's last appeal to her people the most successful domestic loan which has ever been floated. The loan will be advertised in many attractive ways and the appeal to the patriotism of every true Canadian will be well responded to.

Canada is today in the position of a big business house reconstructing her affairs. She is making money but needs more capital to carry on. She is re-establishing her soldiers in a more complete way than probably any other country has ever attempted. It is due these men that they should receive every advantage to help themselves that Canada can give them.

All classes of Canadian people in all trades benefit directly by the distribution of money—the farmer, the artisan, the manufacturer, lum-

"I Hope Every City and District Will Win My Flag"

When Edward, Prince of Wales—eager, bright eyed, smiling and sincere—arrived in Canada in August, and when he voiced his great admiration of the wonderful achievements of Canadians, on the fields of battle and at home, once again we were thrilled with joyous pride.

He asked concerning Canada's reconstruction programme, and when he was told of the Victory Loan 1919, he graciously consented to the use of his Coat of Arms on a flag, which is to be the prize of honour for districts achieving their quota in the loan.

In dedicating "The Prince's Flag" at Ottawa on Labor Day, His Royal Highness said in part:—

"It is a great joy to me to be associated with the loan, which is the bridge between war and peace, and which is finishing off the job."

"I hope every city and district will win my flag."

Striking, and beautiful in design, this flag will form not only a unique memento of Victory Year, but a lasting and outstanding souvenir of the visit of His Royal Highness—a visit which will remain as one of the most memorable events in Canada's history.

The reproduction above shows the design of the flag. The body is white, the edge red; in the upper left hand corner is the Union Jack, and in the lower right hand corner the Prince of Wales' Coat of Arms.

The flag is made in two sizes, 4 feet 6 inches by 9 feet for small cities, towns and villages, and 7 feet by 13 feet 6 inches for cities of over 10,000 population.

Canada has been divided into canvassing districts by the Victory Loan Organization. Each city forms one district. Other districts have been determined according to population.

Each of these canvassing districts has been allotted a certain amount in Victory Bonds to sell. To win the Prince's Flag, therefore, a district has to sell its allotment. That is the one and simple condition.

Anticipating that many districts will buy far beyond their allotment, the organization decided that for each twenty-five per cent. excess of the quota one Prince of Wales' Crest be awarded. Thus the workers in a district doubling its quota will be the proud winners of four small crests for their Honour Flag. These crests will be sewn to the flag. The Prince's Crest—

the three ostrich plumes—is shown at the top of the coat of arms.

To every organization with fifty or more employees, where seventy-five per cent. of the enrollment invests a total of ten per cent. of the annual payroll in Victory Bonds, a supplementary Prince of Wales Flag in smaller form—48 inches by 34 inches—will be awarded.

The allotment for each district has been carefully considered, and is based on a conservative estimate of the purchasing power of the district.

Your district can sell its allotment and thus win the Prince's Flag, provided each person does his or her share.

You will gladly do your part and encourage your neighbour to do his.

Remember YOUR purchase may be the one that decides whether or not your district is to be the proud possessor of the Prince's Flag.

The Prince's Motto is "I Serve"
Will You also Serve?

CANADIAN NATIONAL RAILWAYS

A National Line Under National Management

The Use Of Coarse Grains

People Consume Too Large a Proportion of Refined Material

The public must necessarily judge food very largely by the eye. Green colored apples are difficult to sell, even when of fine quality, but a red apple will usually bring a good price, even though the actual flavor may be better than that of a green apple. In order to make it attractive, has to be coated with glucose and powdered talc, by which it gets its fine gloss. Butter must be yellow to please the purchaser, and is therefore frequently colored with a yellow dye. But the public demands wheat flour in as white a form as possible, and hence it has often been bleached to remove its natural yellow tint. In Bulletin No. 40, "The Use of Coarse Grains for Human Food," which may be had free upon application to the Publications Branch, Department of Agriculture, Ottawa, it is shown that with the advance of civilization and the improving of machinery there has been a tendency to discard the coarse and relatively indigestible substances in our food, with the result that we have reached a stage where most people consume too large a proportion of refined material and too little of the necessary coarse and relatively indigestible substances. Lately, however, people have become alarmed and action has begun against what may be fairly called "over purification of foods." The object of the new bulletin is two-fold: first, to show to farmers generally how they can become more nearly self-sufficient as far as the food supply for themselves and their family is concerned, and second, to point out for the benefit of other classes of people some ways of economizing in the cost of their food, and at the same time improve the wholesomeness of their diet.

Livestock Market

Short Production a Very Dangerous Policy for Canada to Adopt

S. Artlett, Livestock Commissioner, who has recently returned from a trip to Europe, where he has reviewed the livestock market situation, has expressed his views regarding Canada's position, in the October number of the Agricultural Gazette. He states that the London agents of our Canadian packers reviewed in disappointment the orders for Canadian goods—bacon, etc.—for which they could obtain but a tenth of the product they required. The unwarranted high price of hogs in Canada during the past month is but a reflection on the reputation of Canadian bacon, as compared with American, and demonstrates the effort of our packers to minimize their connection with old established clients in the face of short supplies. Since Denmark within a year will again be a factor on the bacon market, our only security for the future is full production and such a substantial export supply as must command recognition by its volume and quality. Short hog production is unquestionably the most dangerous policy Canada can adopt. This is true of eggs as well as bacon.

Professors in Business

Contingent Which the Colleges Must Meet Through Larger Salaries

Has the war given a new status to college professors? asks the New York World. Popular opinion of their practical abilities has heretofore contained an element of scepticism, which is now pretty generally dispelled by the exhibition of competence in many fields of service outside their classrooms. In the words of President Strayer of the National Educational Association, "the war has actually created a market for college professors. Go over the lists of professors and administrative officers and you will find some of the biggest names in the story of the achievements of the war." The effect is inevitably to inspire a competition which the colleges must meet through larger salaries if they are to retain the services of teachers of the first rank. Men of superior endowments whose ambition was limited to university honors have "matched minds" with men in other pursuits in the common service of their country, and the result has been to prove their powers under conditions which naturally dispose them to keep on in the larger field. One department at Columbia has "lost a dozen good men to positions with business or semi-public concerns."

Some men wait so long to make sure that they are right that they never get ahead.

Your position is life is high or low as your ideals are high or low.

Russian Thistle In Manitoba

Immediate Action Will Clean Up Many Patches

Winnipeg—A weed that is spreading fast in Manitoba is the Russian thistle.

This is an annual plant, very soft, dark green in its leaves and innocent looking when young, but developing short, sharp, stiff spines in tremendous numbers at the latter end of the season. The stems of the plant are yellow or grayish striped lengthwise with very pronounced red stripes. While young and green, this weed looks more like the Kochia, or Burning Bush, grown as an ornamental plant in gardens, than anything else.

The Russian thistle grows late in the season. Where it has plenty of room, it will be a foot or more high by the middle of July, but in most cases where it is growing in a crop of grain it does not develop very freely until the crop is cut; then, being still green, and just at the blossoming stage, it grows very fast, and, if given a chance, ripens a great lot of seeds among the stubble. When frost comes, the plant breaks off at the ground and rolls all over the ground, scattering seeds as it goes. By October many of these plants are two or three feet across, exceedingly branched, and full of ripe seeds.

The flowers are not conspicuous enough to attract the attention of an average person. They are placed where the leaves attach to the stems.

The weakness of this weed is its lateness of ripening seeds. A disk following the binder when cutting would destroy a large number of them, as the plant is just beginning to flower when harvest commences. Early skin plowing would bury the plant before it had ripened any quantity of seed.

The Russian thistle is very bad in parts of North Dakota, and is thickly distributed in the southwestern part of Manitoba, with considerable numbers around Brandon and other points along the C.P.R. main line. At several points it has gone farther northward, and is well distributed about Gladstone, and towards Lake Manitoba.

Immediate action will clean up many of the patches that have grown this year, and if cut and burned or plowed under at once they would do much less harm than otherwise. The great damage occurs when the plants are allowed to break off and roll about the country.

The Russian thistle belongs to class 1 as defined in the Noxious Weeds Act, and all weeds inspectors have power to prosecute persons who permit patches to go to seed upon their property.

The value of vigorous cultivation right after harvest cannot be overestimated.

Curious Wagers

Break Bets Appear to Be Less Common Now Than in Olden Days

Curious wagers are less common today than they were in earlier days, when men would undergo personal humiliations and discomforts to win a purse.

One of the strangest is that regarding Lord Digby, in 1670, when he walked five miles around Newcastle, Health in a certain time, barefooted and naked, while the King and his court watched him. Lord Digby lost the wager by a margin of half a minute.

In the eighteenth century a Liverpool scientist bet a brother scientist that he could read a newspaper by the light of a farthing dip at a distance of 30 feet. The scientist performed the feat by coating the inside of a shallow wooden box with sloping pieces of looking glass. The idea led to the modern reflected light system.

Another example of a curious wager was that of a Liverpool cotton broker who, on a bet, wore a pair of wooden shoes to the Cotton Exchange.

The limit in future wagers was possibly reached by a man in a small town who propelled a green pea with a toothpick for about 80 yards along the pavement within half an hour, the stipulated time, and won his wager.

Perfume of White Flowers

According to the investigation of a botanist, out of 3,000 species of flowers cultivated in Europe only 420 possess an agreeable perfume. Flowers with white or cream-colored petals, we are told, are more frequently odorous than others. Next in order came the yellow flowers, then the red, then the blue, and finally the violet, whereof only thirteen varieties out of the 308 give off a pleasant perfume. In the whole list, according to this authority, 3,380 varieties are offensive in odor, and 2,400 have no perceptible smell, either good or bad.

Tree Planting On The Prairie

Committee Formed for the Purpose of Promoting the Planting of Trees

Great interest is being shown in a movement for the planting of trees on the prairies of Canada. For many years the Dominion Government and the Canadian Pacific Railway have been encouraging the planting of trees by distributing, free of cost, young trees and cuttings to farmers who were ready and willing to take care of them. Many beautiful farm homes surrounded by trees testify to the value of this policy.

At the recent convention of the Western Canada Irrigation Association a very interesting paper was read on this subject of "Tree Growing on the Prairie Farms," and as the result of the subsequent discussion, a strong committee was formed for the purpose of further promoting the planting of trees throughout the country. It does not require a great deal of effort to plant trees on these prairie farms. The proper selection of trees and a little care and attention at the right time insures a very good growth, and in this respect the farmer who settles on the open prairie is really better off than he who settles in those districts that have to be cleared, for it is generally easier to plant trees just where they are wanted than to remove them from the places where they are not wanted. Moreover, the treeless land is productive immediately, while the other is not productive until it has been cleared.

An Opportunity For The Hog Raiser

Raising of Hogs Going to Be a Far More Profitable Business Than It Has For Some Time

The following item clipped from the "Live Stock Journal," of London, England, is enlightening:

"May I again remind the farming community that bacon and other pork products are getting dearer, and that the present and future of pig-breeding is still by far the brightest spot in agriculture, and, in addition, is the quickest to make money out of? We want thousands of new pig-keepers, and particularly breeders, to meet even a little of pigs required, live and dead, at home and abroad."

Several signs indicate that the raising of hogs is going to be a far more profitable business than it has been for some time. The demand for pork and pork products on the other side of the water will continue to be very great. It will be a long time before Europe is likely to have sufficient fairs for all new hogs, and a large portion of them will continue to be furnished by pork products. Expert opinions from the other side are that prices will continue to give magnificent returns in this industry.

In Western Canada there is a wonderful opportunity for the hog raising industry. The farmer here has a great advantage over the farmer in other parts of the continent. Although it costs him no more to bring his produce on the markets he is in a position to raise hogs more economically than his competitors, because there are practically no hog diseases in this country, while the low-priced and obtainable in Western Canada is capable of producing immense quantities of food.

A Large Flax Crop

One of the largest crops of flax in Alberta, if not in the whole of Western Canada, is that of the Great West Farm company near Retlaw, in Southern Alberta. This field, on which the harvesters have been busy during the last two weeks, comprises 4,700 acres. The indications are that the yield will average from six to ten bushels to the acre, which, considering the extraordinary dry weather which prevailed in the middle of the summer, is a satisfactory yield for an acreage of this size.

The company owning this farm is headed by an Italian prince named d'Abro. In Calgary and Southern Alberta he is known as plain Mr. d'Abro.

Cattle Bring Top Price

Regina.—A recent shipment of 42 head of cattle from the Thunder Hill Indian reserve elicited favorable comment and sold at the top price on the Winnipeg market. Inquiry was made as to the method of feeding. The reply forwarded states that the cattle never saw the inside of a stable in their lives and their condition was due solely to natural pasture. Eight head of beef steers included in the shipment averaged 1,680 pounds each.

The building of St. Peter's Cathedral in Rome was started in 1450, but was not entirely finished until 1870. It has been estimated that the total cost was not far from \$75,000,000.

Keeping Bees For Their Sting

Druggists Use These to Manufacture Formic Acid

A woman has found that it is more profitable to rear bees for their stings than for the honey they produce. During the last twenty-four years she has supplied druggists with fifty thousand stings a year. To produce these stings she keeps two colonies of bees, whereas it would require fifty colonies to produce an amount of honey of equal value.

The bees are gathered in an especially constructed box, and taken into a darkened room. Then, taking them up by their heads, the woman holds them under a magnifying glass, and extracts the sting with a pair of tweezers. The stings are placed in a dish of milk sugar, which prevents decay.

Druggists use these stings to manufacture formic acid. This is used by doctors to treat rheumatism and to restore circulation in cases of paralysis. Originally this acid was obtained by distilling common red ants (formica rufa), from which the name is derived.

Holsteins For Austria

Shipment Only First of Herd to Be Exported

The first Holstein cattle to be introduced into Australia were taken to Sydney, N.S.W., on the steamer Tahiti, which left Vancouver September 9th. Although only seven head are included in the shipment, they comprise only the first of what is expected to be a considerable herd, to be exported from the farms of British Columbia to the Government-supervised agricultural schools of Australia.

Mr. J. F. Simmonds, an Australian cattle expert, was delegated some time ago to arrange for the export of the cattle, and negotiations for the purchase were carried on largely through Dr. S. F. Tolmie, Minister of Agriculture, and president of the Holstein-Friesian Association of Canada. A second shipment will be sent in March.

There is one bull and six heifers in the shipment. The bull was purchased from Mr. Sayward's Saanich ranch. Three of the heifers were secured from Mr. G. T. Corfield, at Duncan, and the other three heifers were obtained on the Mainland.

A "Health Town"

Expectations of Those in Charge of Plan Fully Realized

It is three years since the Metropolitan Insurance Company of New York gave the National Tuberculosis Society of the United States \$100,000 to establish a "health town" for the purpose of experimenting in the saving of human life. The purpose was "to show that unnecessary sickness and death, particularly tuberculosis, can be eliminated by medical and nursing care, personal hygiene, and adequate health administration." To assist the experiment, the town of Framingham, Mass., was chosen by the society, raised its own expenditure on health administration from 39 cents to \$1 for each inhabitant.

The more recent results of the Framingham effort have been made public, and they show that the expectations of those in charge of the plan have been fully realized. Before the experiment commenced, 121 persons in a town of 16,000 died of tuberculosis in the year. For the three years of the test the number of deaths was 92, 79 and 76 respectively. The death rate among infants has also been greatly reduced. No new methods were used in Framingham. Any town could do the same thing. Any calculation on the value of human life would show that it would pay—Ottawa Journal.

Must Get Back to Work

It is exceedingly difficult to get out of the mood of war, out of hatred, and the desire for destruction, into the mood of peace, constructive effort, and obedience to law. But it must be done. The world must get back to work, and to the thoughts and habits of peace. That does not mean that we can return to the old conditions. There are social injustices which must be remedied, and those who do the hard work of the world must be assured that they will be fairly rewarded and their service fully recognized.—From the Toronto Star.

It might be well to remember that hanging a horseshoe on the door will not bring you as much good luck as hanging a padlock on your lips.

Violet-scented seaweed grows in the lakes of the Manichalk Peninsula, in the Caspian Sea, and is pleasant odor therefrom scents the air for miles around.

Something America Should Learn

People Do Not Understand Relative Value of Foods

All America needs to go to school and learn how to eat. This is really more useful to the rank and file than ability to decipher the cuneiform inscriptions. It also seems as essential in the present fight against high cost of living as was knowledge of how to handle the rifle and bayonet to the soldier a few months ago. For instance, the national food bill amounts to \$18,000,000,000 a year because the people do not understand the relative value of foods. Cereals, potatoes, sugar and fruits, for instance, which cost but one-third the total, furnish nearly two-thirds the food value of all that is consumed. In other words, two-thirds the bill is spent for one-third of what we actually get in food value. Obviously, if instead of prosecuting the packers and dragging out of cold storage food laid up in time of plenty for use in season of scarcity, we learned to market and eat according to the value of the food (measured by calories instead of dollars), we could reduce food costs one-third and rout the common enemy—high cost of living.—Wall Street Journal.

Filling The Silo

This Work Should Not Be Done Too Rapidly

The corn, sorghum and other crops similar to these should be allowed to ripen before being cut for the silo, but should be cut before any of the leaves fall off. In other words, let it ripen to a point that will give the highest germination test of the seed without loss of leaves. The largest percentage of nutrients is formed during the last two weeks preceding this stage. When the crop is cut too early it gives a low percentage of dry matter and a low percentage of digestible nutrients. In case of frost the sooner the crop is cut the better.

The cutter knives should be well sharpened and set so as to make a clean complete cut. This saves power and gives a better silage. When the crop is partially shredded it does not pack well, air cannot all be expelled and the silage is likely to be of an inferior quality.

The filling should not be too rapid, as there is a possibility that the silage will not be well packed. At ordinary rate of filling two good men should be placed in the silo to distribute, mix and tramp the corn as it comes from the cutter. To insure good silage every phase of this work must be carefully done. Good men only should be assigned to this part of the operation. Men who take advantage of their boss should not be put in the silo.

If the corn has been frosted or is a little dry when it is put into the silo, water should be added. The best way this can be done is to connect a barrel with the blower and allow a small stream of water to enter and the water will be blown up with the corn into the silo. Corn a little dry does not pack well or keep well. Enough water should be added to cause the corn to pack well.

In sealing the silo, all that is necessary is to wet the corn thoroughly and tramp it well. If this is done there will be a very small amount of spoiled silage.—R. W. Clark.

To Study In America

Young Chinese College Men and Women Will Enroll in American Universities

Honolulu, Hawaii.—One hundred and thirty-seven young Chinese college men and women, all of them graduates of Chinese universities, passed through Honolulu recently on their way to the mainland, where they will enroll in American colleges and universities.

The party, which includes two Chinese girls who have won scholarships at the University of Michigan, is in charge of Dr. Ming S. Low, registrar of the University of Tsing Hua at Peking. Seventy of the students are graduates of Tsing Hua, and the balance are alumni of other educational institutions in China. The students will take up courses in American colleges and universities ranging from agriculture to railway administration, business law, social service and physical education.

The Customer: Here, you! Wake up and bring my dinner. I didn't order it for a late supper.

The Waitress: Where's your manner? You're talkin' to a lady. I ain't your wife.

France has fewer paupers and fewer millionaires than any other prominent country.

French soldiers in uniform are allowed on the railways at quarter fare.

Blind Visitors At Niagara

More Than One Hundred Men and Women Only Sensed Its Wonders

The strangest tribute ever paid to the splendor of Niagara was the visit of more than one hundred blind men and women, who saw not a single drop of the white masses that toppled over the precipice, but only sensed its wonders by that uncanny perception which comes at last to those who make their life's journey through unending darkness.

Miss Rosetta M. Stone, of Detroit, conducted the party, whom she enthralled by her vivid description of the scene. An artist by training, she drew pictures on the backs of the blind folk's hands almost as clear as those she produced with her lips. She led them to spots where the mists of Niagara wet their cheeks, where the winds of the cataclyc tossed their hair. The roar made the blind tremble. "It's a terrible storm in the woods," whispered a white-faced girl. At the edge of the river where it sweeps past Goat Island the blind girls stopped and thrust in their hands so that they could feel the rush of the current, the life of Niagara. They picked stones out of the water to take home as mementoes of that wonderful experience. Old men thrust in their canes and felt the swirl. All described the sensation as "wonderful!"

Future Of Earl Haig

Field-Marshal Would Like to Become Commander-in-Chief in India

The future of Field-Marshal Earl Haig is said to be greatly exercising the thoughts of the government. Given a free choice, the Field-Marshal would greatly like to become Commander-in-Chief in India, but the fact that he is now Colonel of the Royal Horse Guards rather complicates matters, since this appointment carries with it the office of Lord Steward of the Household, and as such it is necessary for the holder to be on duty once in every three months.

It is now suggested that Earl Haig should retain his present appointment as Commander-in-Chief of the home forces. Probably this is what will eventually be done, but the government has so far arrived at no decision in the matter.

King's Discharge

Certificate Will Be Issued to All Discharged Soldiers

Ottawa.—The King's certificate of discharge will be issued through the Militia Department to all discharged soldiers who, after serving in a theatre of war, as a result of disengagement in military service, discharge as medically unfit. It is also being issued to those who, while not serving in a theatre of war, were discharged as a result of disability caused by air raids, naval bombardments, etc. The certificate is a handsome engraved document about 17 inches by 22 inches, and is distributed without being folded. Applications for them may be made on cards which are now available at the principal postoffices.

Auto Sleds for Snow Roads

Judging by the report of the performances of a new auto sled in the mountains near Seattle, the problem of travelling over snow by motor power has been solved by using the caterpillar traction found serviceable in adapting the motor-driven vehicle to farms and cattlefolds. Hitherto snow had presented a baffling obstacle to progression by motor; but the new auto sled is said to have operated successfully over snow-covered surfaces under the worst conditions likely to be encountered. An extended trip with three men and a full load is a test that seems reasonably promising of a new means of travelling in the land of the dog sled.—Christian Science Monitor.

Hundred Bushels to the Acre

A yield of one hundred bushels per acre from an eighteen-acre field has been obtained by Mr. Fulton on his farm at Oakland, Manitoba. The land had received careful attention, but the total of 1,800 bushels was a surprise even to the producer. The oats were of the ordinary hard variety. The land on this farm has been cropped for forty years, and a return of this quantity indicates the marvelous soil quality of the Prairie Provinces of Canada. The oats sold at Oakland on car at 82 cents per bushel.

If you have occasion to gather thistles, hire a substitute.

A wise woman never questions the age of a woman.

A Pimple Remover That Never Fails

Dr. Hamilton Stands Behind His Formula

Bad blood is always responsible for pimples, blackheads and humors. Pimples, eczema and boils are the common result.

I contend that to cure these ills, the liver, kidneys and bowels must receive attention.

My remedy, known as Dr. Hamilton's Pills of Mandrake and Butter-nut, invariably reaches the trouble.

For putting life into sleepy organs, for forcing out every kind of waste and foreign matter, for making health-sustaining blood, for curing facial blemishes and skin diseases.

In a thousand cases I have demonstrated that Dr. Hamilton's Pills cure facial blemishes and skin diseases.

I look upon these pills as the best blood purifier and a system builder of the age, and guarantee they will cure every complaint having its origin in a weak or debilitated blood supply.

If Dr. Hamilton's Pills will not cure that tired, rundown condition, if they will not change lack of force into energy and vim, then nothing will.

By creating an abundant supply of rich, nourishing blood they maintain that standard of health so much desired by those participating in the strenuous life we live today.

Get Dr. Hamilton's Pills and prove their merit today. 25c per box.

THE COW PUNCHER

— BY —
ROBERT J. C. STREAD

Copyrighted, Canada, 1918, By The Mussion Book Co., Ltd., Toronto. Printed By Special Arrangement.

(Continued.)

A light of satisfaction was in his teacher's eyes as Dave made this answer. Mr. Duncan had realized that he was starting late with this pupil, and if there were any short cuts to education he must find them. So he had set out deliberately to instill the idea that education is not a matter of schools and colleges, or courses of reading, or formulas of any kind, but a matter of the five senses applied to every experience of life. And he knew that nothing was coarse or common that passed through Dave's hands. Coal had ceased to be a smutty mineral, and had taken on talismanic qualities unguessed by the mere animal workman; and sugar and coffee, and beans, and rice, and spices, each would open up its own wonderful world before this young and fertile mind. As a heritage from his boyhood on the ranges, Dave had astonishingly alert senses; his sight, his hearing, his sense of smell and of touch were vastly more acute than those of the average university graduate. . . . And if that were not enough, it was fairly he said that Dave was already the better educated of the two, even if he, as yet, knew nothing of the classics?

As Dave parted from the Metford gang he felt that he knew what Mr. Duncan had meant by the dead-line. These were men who would always shovel coal, because they aspired to nothing better. There was no atom of snobbery in Dave's nature; he knew perfectly well that shovelling coal was quite as honorable and respectable a means of livelihood as managing a bank, but the man who was content to shovel coal was on the dead-line. . . . And, by the same logic, the man who was content to manage a bank was on the dead-line. That was a new and somewhat startling aspect of life. He must discuss it with Mr. Duncan.

Dave's energy and enthusiasm in the warehouse soon brought him promotion from truck hand to shipping clerk, with an advance in wages to sixty-five dollars a month. He was prepared to remain in this position for some time, as he knew that promotion depends on many things besides ability. Mr. Duncan had warned him against the delusion that man is entirely master of his destiny. "Life, my boy," he had said, "is fifty per cent. environment and forty per cent. heredity. The other ten per cent. is yours. But that ten per cent. is like the steering gear in an automobile; it's only a small part of the mechanism, but it directs the course

of the whole machine. Get a good grip on the part of your life you can control, and don't worry over the rest."

To economize both time and money Dave took his lunch with him and ate it in the warehouse. He had also become possessed of a pocket encyclopedia and it was his habit to employ the minutes saved by eating lunch in the warehouse in reading from his encyclopedia. It happened one day that as he was reading in the noon hour Mr. Trapper, the head of the firm, came through the warehouse. Dave knew him but little; he thought of him as a stern, unapproachable man, and avoided him as much as possible. But this time Mr. Trapper was upon him before he was seen.

"What are you reading?" he demanded. "Yellow backed nonsense?" "No, sir," said Dave, rising and extending his arm with the book.

"Why, what's this?" queried Mr. Trapper, in some surprise. "Ten-ten—oh, I see, it's an encyclopedia. What is the idea, young man?"

"I always like to read up about the stuff we are handling," said Dave, it's interesting to know all about it; when it comes from, how it is grown, what it is used for, the different qualities, and so forth."

"Eh?" said Mr. Trapper, returning the book. "No doubt." And he walked on without further comment. But that afternoon he had something to say to his manager.

"That young fellow on the shipping desk—Ellen, I think his name is. How do you find him?"

"Very satisfactory, sir. Punctual, dependable, and accurate."

"Watch him," said Mr. Trapper. The manager swung around in his chair. "Why, what do you mean?"

"He hasn't occasion to suspect—"

Mr. Trapper's customary sternness slowly relaxed, until there was the suggestion of a smile about the corners of his mouth, and rather more than a suggestion in the twinkle in his eye.

"Do you know what I caught that young fellow doing during noon hour?" he asked. "Reading up the encyclopedia on tea. Tea, mind you. Said he made a practice of reading up on the stuff we are handling. We mind you. Found it very interesting to know where it came from, and all about it. I've been in the grocery business for pretty close to forty years, and I've seen many an employee spend his noon hour in the pool rooms, or in some other back room, or just smoking, but this is the first one I ever caught reading up the business in an encyclopedia. Never read it that way myself. Well—you watch him. I'd risk a ten-spot that he knows more about tea this minute than half of our travellers."

But Dave was not to continue in the grocery trade, despite his reading of the encyclopedia. A few evenings later he was engaged in reading in the public library; not an encyclopedia, but Shakespeare. The encyclopedia was for such time as he could save from business hours, but for his evening reading Mr. Duncan had directed him into the realm of fiction and poetry, and he was now feeling his way through Hamlet. From the loneliness of his boyhood he had developed the habit of talking aloud to himself, and in abstracted moments he read in an audible whisper which impressed the substance more deeply on his mind, but made him unpopular in the public reading rooms. It was well known among the patrons of the rooms that he read Hamlet. This fact, however, may not have been altogether to Dave's disadvantage. On the evening in question an elderly man engaged him in conversation.

"You are a Shakespearean student, I see?"

"Not exactly. I read a little in the evenings. But I haven't gone far enough to call myself a student."

"I have seen you here different times. Are you well acquainted with the town?"

"Pretty well," said Dave, sensing that there might be a purpose in the questioning.

"Working now?"

Dave told him where he was employed.

"I am the editor of 'The Call,' said the elderly man. "We need another man on the staff; a reporter, you know. We pay twenty-five dollars a week for such a position. If you are interested you might call at the office tomorrow."

Dave hurried with his problem to Mr. Duncan. "I think I'd like the work," he said, "but I am not sure whether I can do it. My writing is rather—wonderful."

Mr. Duncan turned the matter over in his mind. "Yes," he said at length, "but I notice you are beginning to use the typewriter. When you learn that God gave you ten fingers, not two, you may make a typist. And there is nothing more worth while than being able to express yourself in English. They'll teach you that

A cool, clean shave for 1/5 of a cent!

A cool, clean, satiny shave for 1/5 of a cent—think of it! At least 500 shaves are obtained from 12 AutoStop blades, and you often get more than that.

Just a turn or two on the strop and your AutoStop Razor is ready. After shaving, you press a little lever, put the blade under the tap, wipe it off, and it is ready for the next shave.

There is no need to take the razor to pieces and assemble it again simply leave the blade where it is from start to finish. This means time saved in the morning rush—and a razor blade that's good for about six weeks' clean, cool shave.

Razor—12 blades—\$5

AutoStop SAFETY RAZOR

on a newspaper. I think I'd take it.

"Not on account of the money," he continued, after a pause. "You could probably soon be earning more in the wholesale business. Newspaper men are about the worst paid of all professions." But it's the best training in the world, not for itself, but as a step to something else. I have often wondered why editors, who are forever setting every other phase of the world's work to rights, are content to train up so many thousands of bright young men—and then pass them along into other businesses where they are better paid. But the training is worth while, and it's the training you want. Take it."

Dave explained his disadvantages to the editor of "The Call." I didn't want you to think," he said with great frankness, "that because I was reading Shakespeare I was a master of English. And I guess if I were to write up stuff in Hamlet's language I'd get canned for it."

"We'd probably have a deputation from the Moral Reform League," said the editor, with a dry smile. "Just the same, if you know Shakespeare you know English, and we'll soon break you into the newspaper style."

So, almost before he knew it, Dave was on the staff of "The Call." His beat comprised the police court, fire department, hotels, and general pick-ups. And the very first day, as though to afford fuel for his genius, a small fire occurred in a clothing store.

"So good for two sticks—about four inches," said the editor, when Dave had given him the main facts. "Write your story to fit."

Dave suddenly realized that, although he had been a persistent reader of newspapers during the recent months, he had scarcely the remotest idea of how many words went to a column, or to an inch. It was a piece of information needed at once, so he set about to count the words in a column. Then he wrote his story to fit. He had already learned that

"S. O. S. If Constipated, Bilious or Headachy, take 'Cascarets'."

sick headache, biliousness, coated tongue, or sour, gassy stomach—always trace this to torpid liver; delayed, fermenting food in the bowels. Poisonous matter clogged in the intestines, instead of being cast out of the system is re-absorbed into the blood. When this poison reaches the delicate brain tissue it causes congestion and that dull, throbbing, sickening headache.

Cascarets immediately cleanse the stomach, remove the sour, undigested food and foul gases, take the excess bile from the liver and carry out all the constipated waste matter and poisons in the bowels.

A Cascaret tonight will surely brighten your morning. They work while you sleep.

Buys Drilling Plant

The Great West Natural Gas Company of Calgary have purchased the California oil well drilling plant owned at Eastend by a local syndicate, and it is reported that they are moving it to the field which they have selected for the purpose of supplying natural gas to Moose Jaw and Regina. The plant is said to be one of the best of its kind, and is capable of drilling to a depth of 5,000 feet.

Reparative Huns Soon

Paris.—All German prisoners still detained in France will be repatriated direct, after the ratification of the peace treaty, according to information received from Berlin. The Swiss legation in Paris, it is stated, sent information to this effect to the central office for prisoners of war for transmission to Germany.

Willie's Composition on Soap

"Soap's a kind of stuff made into nice looking cakes that smells good and tastes awful. Soap pieces always taste the worst when you get it into your eye. My father says the Eskimo doesn't never use soap. I wish I was an Eskimo."

Proof

"So you think you have a forgiving nature?"

"I must have. I always go back to the same dentist."

The Cuticura Toilet Trio Consisting of Soap, Ointment and Talcum is an indispensable adjunct of the daily toilet in maintaining skin purity and skin health.

everything in a newspaper office, from a wedding to a ball game, is 'a story.' When he turned his in it looked like this:

The fire bell was heard ringing this morning about ten o'clock, and soon after crowds were seen heading their way to the Great West Clothing Store. There was a heavy black smoke coming from the back end of the store. The firemen were late in getting there, and before they arrived a man had got badly choked by trying to go into the store. Presently the engine came up and before long water was being applied in great quantities, and soon the fire was under control. Part of the roof fell in and the building is pretty badly ruined. Some of the contents may be fit for sale. It seems too bad that the fire engine should have been so long in coming, as without doubt if it had got there promptly the fire could have been put out before much damage occurred. However, it might have been worse, as it was a frame building, in a row of other frame buildings, and if the fire had once got beyond control much damage might have been done. Nobody seems to know how the fire started.

It was with much quiet excitement that he awaited the appearance of the evening edition. He had a strange eagerness to see his contribution in print; a manifestation, no doubt, of that peculiar trait in human nature which fills the editorial waste basket with unaccepted contributions.

(To Be Continued.)

A Pioneer Of Aviation

Alberto Santos Dumont First Pilot to Fly an Aeroplane

To many readers the name Alberto Santos Dumont will be unfamiliar, and yet it is the name of one of the most successful pioneers in aviation. He is a native of Brazil, and has been president of the Aeronautic Federation of the Western Hemisphere. He is now visiting North America for the purpose of studying the improvements made in aviation since he showed the world how to fly. He was the first pilot of a dirigible balloon, and the first to fly an airplane. His interest in balloons developed at an early age, and in 1901 he had perfected a dirigible with which he won at Paris the prize of \$50,000. He was made a chevalier in the French Legion of Honor in 1904 and received the officers' cross in 1909.

"Flying," said Santos Dumont in a recently given interview, "is a young man's game, and I will do my flying now as a passenger. He characterized the Atlantic flights as "wonderful achievements," but said the real progress in aviation is being made in shorter and more practical flights.

Nationalist Troops Expel Turk Officials

Possession of Konie Is of Great Strategic Importance

Constantinople.—The troops under the Nationalist leader Mustafa Kemal Pasha, who recently set up a separatist government in Asia Minor, have occupied the city of Konie, in southern Asia Minor, and expelled the authorities.

Earlier dispatches had reported the convening of a separatist parliament by Mustafa Kemal to meet at Erzerum, the site of his government, and activities of his troops in the vicinity of Smyrna and Erzerum. The presence of his troops in sufficient strength to take possession of Konie, a city of 45,000 inhabitants and one of the most important administrative centres of Asia Minor, had not hitherto been reported in that section. Possession of this city is of great strategic importance, since it is the railroad of the railroads heading from Constantinople and from Smyrna.

Canada's Railways

There are 39,000 miles of steam railways in Canada, but if all tracks be taken into account, such as double tracks, yard tracks and sidings, there are 50,853 miles. The first railway in Canada was opened in 1836 between Laprairie on the south bank of the St. Lawrence River, nine miles above Montreal, and St. Johns, on the Richelieu River. Its length was 16 miles. That continued to be the total railway mileage until 1847, when it was increased to 51 miles.

"Where is the Dead Sea, Tommy?" asked the teacher.

"Don't know, m'am," was the candid reply.

"Don't know where the Dead Sea is?" There was a scorn in teacher's voice.

"No m'am," came the reply. "I didn't even know any of them was sick."

Sixty Acres Broken in Nine Days

Ease and Rapidity With Which the Prairie of Western Canada Can Be Broken Up

An example of the ease and rapidity with which the virgin prairie of Western Canada can be broken up and made ready for crop is provided by Mr. Howard Blachly, who is farming 480 acres of irrigable land in Southern Alberta, between Duchess and Patricia.

Mr. Blachly came to Alberta from Idaho some five or six weeks ago when he inspected the land and purchased it. He returned to Ohio and after disposing of his property in that state, returned to Alberta. He purchased a Titan 10-20 h.p. tractor and with one man to help him, started breaking on September 2nd. Nine days later Mr. Blachly had plowed 60 acres and had 45 acres of this double disc and harrowed.

Mr. Blachly is a nature very proud of this performance and states he has never seen land which works up in better shape.

Many men get ahead by inducing other men to put their shoulders to the wheel.

It Works! Try It

Tells how to loosen a sore, tender corn as it lifts out without pain.

Good news spreads rapidly and druggists here are kept busy dispensing freezone, the ether discovery of a Cincinnati man, which is said to look on any corn so it lifts out with the fingers.

Ask at any pharmacy for a quarter ounce of freezone, which will cost very little, but is said to be sufficient to rid one's feet of every hard or soft corn or callus.

You apply just a few drops on the tender, aching corn and instantly the soreness is relieved, and soon the corn is so shriveled that it lifts out with out pain. It is a sticky substance which dries when applied and never inflames or even irritates the adjoining tissue.

This discovery will prevent thousands of deaths annually from lockjaw and infection heretofore resulting from the suicidal habit of cutting corns.

Tobacco smoke is one of the pet abominations of the former German Kaiser, so that the exiled Wilhelm the once most highest, has to go into the garden of Castle Bentwich when he wishes to enjoy his cigar or cigarette.

People who are looking for trouble are fortunate in one respect, at least—they seldom meet with disappointment.

WELL SATISFIED WITH BABY'S OWN TABLETS

Mrs. A. Bernard, La Presentation, Que., writes: "I have used Baby's Own Tablets for my baby and am well satisfied with them. I have recommended them to several of my friends, who have also used them with beneficial results." The Tablets are a mild but thorough laxative which regulate the stomach and bowels and thus prove of benefit in cases of indigestion, constipation, colic, colds, etc. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Proved

Her: Then you consider woman more intelligent than man? Miss Forward: Decidedly! Man hasn't even intelligence enough to recognize his inferiority.—Boston Transcript.

Dragged Down By Asthma.—The man or woman who is continually subject to asthma is unfitted for his or her life's work. Strength departs and energy is taken away until life becomes a dreary existence. And yet this is needless. Dr. J. D. Kellogg's Asthma Remedy has brought a great change to an army of sufferers. It reduces the restricted air tubes and guards against future trouble. Try it.

Hard at Work

The rapidity with which Belgium got on its feet again suggests that the Belgians didn't sit down and haggle about how many hours a day they should work.

Western Farmlands Boom Only Starting

Americans Coming Into Western Canada Intend to Remain

Farm lands in the good agricultural districts of the West will be much in demand in the next two years, according to Arthur Jackson, Winnipeg, farm land agent, who says that the movement of American farmers to Western Canada has only just begun. That the Americans who are already flocking into the country intend to settle down is evidenced by the fact that they are bringing stock and implements with them.

The reason for the influx of Americans is the boom in Middle West farm lands. Farmers in Iowa and similar states can sell their land now for as high as \$15 an acre, and coming to Canada purchase the best of our western lands for from \$20 to \$85 an acre, depending on location.

So great is Mr. Jackson's faith in the marketable value of farm lands in Western Canada that he expects to take a trip in about six weeks through North and South Dakota, Minnesota, Iowa, Ohio and Illinois, where he will place large blocks of land on the realty markets. Later he will visit the eastern provinces of Canada for the same purpose.

Minard's Liniment Cures Dandruff.

Interesting War Statistics

The British Empire's Total Fighting Men for the War

Prior to the call to hostilities the United Kingdom had under arms only 753,514 men. During the war nearly seven times that many have been recruited; in all, 4,970,002—4,006,158 from England, 537,618 from Scotland, 272,924 from Wales and Monmouth, and 134,200 from Ireland. Thus, from a population of 47,000,000, Great Britain and Ireland gave a total of nearly 6,000,000. The overseas dominions added about twenty-five per cent. more: Canada, 628,904; Australia, 416,809; New Zealand, 220,099; South Africa, 136,070; Newfoundland, 11,922; the smaller colonies, 12,000—in all, 1,425,864. These India added 1,401,350. Colored troops from other parts of the Empire number 122,837. The British Empire's total of fighting men for the war reached, therefore, no less than 8,654,467. They were distributed as follows: France, 3,309,563; Italy, 145,764; Salonika, 404,207; the Dardanelles, 467,987; Mesopotamia, 889,702; Egypt and Palestine, 1,192,511. The casualties reported number: in France and Belgium, 2,724,203; in Italy, 629,624; at the Dardanelles, 119,578; in the Balkans, 28,092; in Mesopotamia, 111,549; in Egypt and Palestine, 39,996; in East Africa, 19,572. Worked out in percentages to the total sent overseas, the casualties classify thus: For the United Kingdom, 43 per cent.; Canada, 44.88; Australia, 63.36; New Zealand, 50.70. The United States sent 2,040,000 men to France and the casualties were 264,998, or 13 per cent.—The Round Table.

You can learn a little each day—unless you are one of those persons who know it all.

Taking things as they come and selling them—at a profit begets success.

Many mothers have reason to bless Mother Graves' Worm Extremator, because it has relieved the little ones of suffering and made them healthy.

Ex-Kaiser's Castles Looted

Valuables Taken From Berlin By Underground Methods

Thefts from the castles of former Emperor William and the Crown Prince Frederick, not only during the revolution, but during the January and March riots of the Spartacists and Communists, are still engaging the attention of the police. Slowly the authorities have been able to recover some of the valuables that were pilfered by the sailors who occupied the ex-emperor's palace and that of his son for a time, but an immense amount has been taken from Berlin by underground methods, and may never be recovered. From the palace of William I. there have been stolen figures in bronze and ivory, a pastel of Queen Louise, vases, letter containers, silver trays, Japanese silk portieres and curtains, decorative weapons, medallions, watches and mirrors. The Crown Prince's residence suffered similarly. Cigarette cases, of which the Crown Prince had a wonderful collection, are missing, a jeweled collar, writing material, clocks, a watch set with diamonds, two sapphires, two automobile five hunting guns and a gold revolver.

IN EVERY STABLE SPOHN'S DISTEMPER COMPOUND is the one indispensable remedy for contagious and infectious diseases among horses and mules. It protects all a proprietor and cure for DISTEMPER, PINK EYE, COUGHS and COLDS for more than twenty years. It is endorsed by the best horsemen and livestock men in America. Buy it of your druggist. SPOHN MEDICAL COMPANY, GOSHEN, INDIANA, U.S.A.

Kitchen Economy

If you consider its body-building powers Bovi is probably the most economical food you can buy. No other food, no matter how high its price, has been proved to possess Bovi's wonderful body-building powers. Bovi saves butchers' bills and is a great economiser in the kitchen.

Photograph Kaiser

Former Emperor Offers Large Sum to Suppress Pictures

Strong efforts are being made to prevent the publication of photographs of former Emperor William of Germany, taken recently by two Dutch photographers, who were concealed in a load of hay near Count Hohenzollern's temporary home.

The former emperor is said to have offered a large sum for the negatives and all prints made from them. The correspondent of the Associated Press has seen the pictures, which show Count Hohenzollern bearded and sturdy appearing in a happy mood, while talking to his wife and General Gontard, unconscious of the presence of the camera man.

Nothing to Show 'Em

An American who has lived in England a great many years recently said to me: "When I first came over I thought the English were slow, easy and had to be shown. Now I still think that they are slow, but they are certainly not easy, and I'll be hanged if I've got anything to show 'em."

Aches and Pains Quickly Relieved

You'll find Sloan's Liniment softens the severe rheumatic ache

Put it on freely. Don't rub it in. Just let it penetrate naturally. What a sense of soothing relief soon follows! External aches, stiffness, soreness, cramped muscles, strained sinews, back "cricks"—those ailments can't fight off the relieving qualities of Sloan's Liniment. Clean, convenient, economical. 35c, 70c, \$1.40. Made in Canada.

Sloan's Liniment Keep it handy

Best Time to Plow
Never plow ground when it is dry and never plow ground when it is wet, says Campbell's Scientific Farmer. To plow heavy soil when dry is a positive injury to the soil and a needless waste of power. It is always best to wait until the upper layer is sufficiently moist to turn over easily and crumble readily. Plowing in the best condition to respond to the pulverizing effect of the mould-board.

Wood's Great Peppermint Cure
The Great English Remedy. HELP THE VICTORY LOAN

The Victory Loan campaign in Southern Alberta is going with a swing. Reports from the central committee in Calgary say that the captians have completed their organization and that the loan is meeting with a far better reception than had been anticipated. There will be a great deal of honor in going "over the top" on this loan and it is to be hoped that this district will do its share and will make at least as good a record as last year.

A Victory Loan 1919 is going to be very popular indeed. In the first place the security is excellent and the investment is a better one than will probably be available in government bonds after this occasion. To get Canada's bonded obligations bearing 5½ per cent interest at far is something that was not dreamed of before the war and will not be again. For this reason, there is little doubt that the bonds will go above par on the market almost as soon as they are issued, and that anyone who buys

them during the campaign will be able to sell them at a profit thereafter. That, at least, is the history of the previous bond issues and there is no reason why it should not be the history of this one.

Southern Alberta is especially interested in the success of the Victory Loan because the money is to be used for the re-establishment of our soldiers and the financing of crop and other similar payments. Being an agricultural country, Southern Alberta will feel more direct benefit out of the Victory Loan than most other portions of Canada and it is therefore all the more her duty to support the loan to the best of her ability.

Organization and work are progressing in this district and in others and the general committee asks that the public assist their local canvassers in every possible way and especially by subscribing promptly and as liberally as possible when the canvassers come around. The selling campaign will open on October 27 and continue till November 15.

Chinook Breezes

The weather this week is very decidedly wintery.

Mr. and Mrs. J. W. Lawrence left last week for Nelson, B.C., where they will spend the winter.

School is closed to day on account of teachers' convention at Delia.

Mrs. J. L. Carter and children are spending two or three weeks with friends in Delia.

Sandman—At Chinook, on Friday, Oct. 17th, to Mr. and Mrs. Thos. Sandman, a son.

Dickout—South of Chinook, on Thursday, Oct. 23rd, to Mr. and Mrs. Dickout, a son.

Gregg—At Calgary general hospital, Oct. 8th, to Mr. and Mrs. Norman Gregg, a daughter

Gilbertson—At Chinook, on Monday, Oct. 13th, to Mr. and Mrs. Thos. Gilbertson, a son.

Mrs. Ailsworth left last week to spend the winter with friends in the States.

Mr. Schubert of Denver, Col., is the guest of his sister, Mrs. H. Meade.

Mr. and Mrs. Lawrence, Ont., who are visiting friends in Spokane, are expected back in Chinook this week.

Mr. M. J. Hewitt of Chinook has recently been appointed Police Magistrate. This gives jurisdiction equal to two Justices of the Peace.

Miss Mackineaw of Glasgow, Scotland, who has been visiting her sister, Mrs. A. Wilson, for the past two or three weeks, is visiting her brother in Calgary.

Mr. Geo. Marr has been and still is in a very critical condition from pneumonia. His many friends wish him a speedy recovery.

We regret to learn that both Charlie Herve and his young daughter have been and still are very seriously ill. We hope for their speedy recovery.

Posters are out for a pie social and dance, under the auspices of the Chinook agricultural society, on Halloween, Oct. 31st, in the Chinook school auditorium. An excellent program and good music. Everybody welcome.

Our attention has been called to the very dangerous condition of the two crossings to the depot which should receive attention before something serious happens.

Daylight saving ends on Oct. 26th, when the railway time will be put back one hour. Only the railways will be affected by the change. The passenger train going east will then be 4:05 a.m. and the train going west will be 4:25 a.m., from Chinook.

The anniversary services of the Chinook church will be held on Sunday, Nov. 2nd, followed on Monday, the 3rd, by a chicken pie supper. Good program is being prepared. The Rev. Mr. Geson of Youngstown is the special preacher for Sunday.

A quiet wedding took place at the Chinook parsonage, the Rev. G. Elliott officiating, on Thursday, Oct. 16th, when Mr. Chas. Albert Pool, of Chilmark, was united in marriage to Miss Frances Hamilton, of Montreal. The happy couple will reside at Chilmark.

Wheat Straw for Sale

I have a stack of about 15 loads of this year's Wheat Straw for Sale, to be taken at once. Price arranged.
JAS. MONTGOMERY
12-27-7-4 Chinook
